

# Orange Star Bomber instructions

## step 1

## step 2

## step 3

## step 4

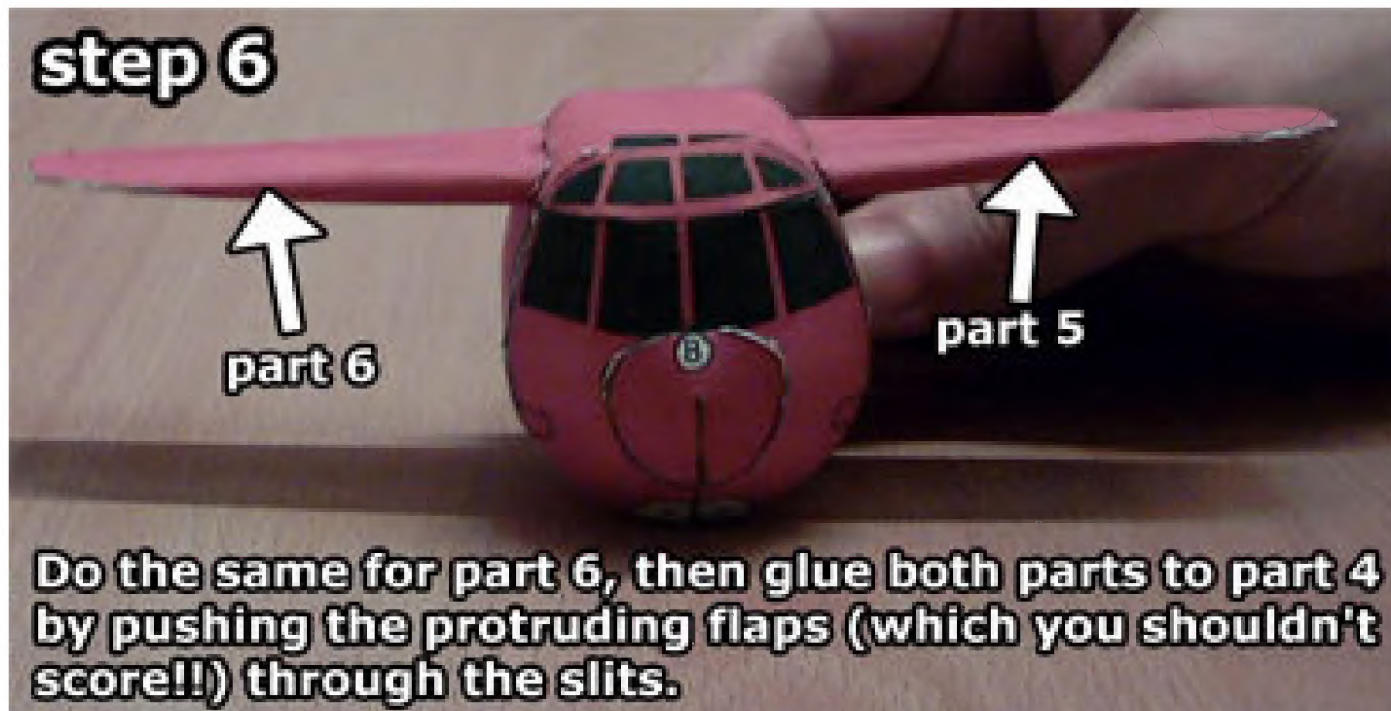

### step 5

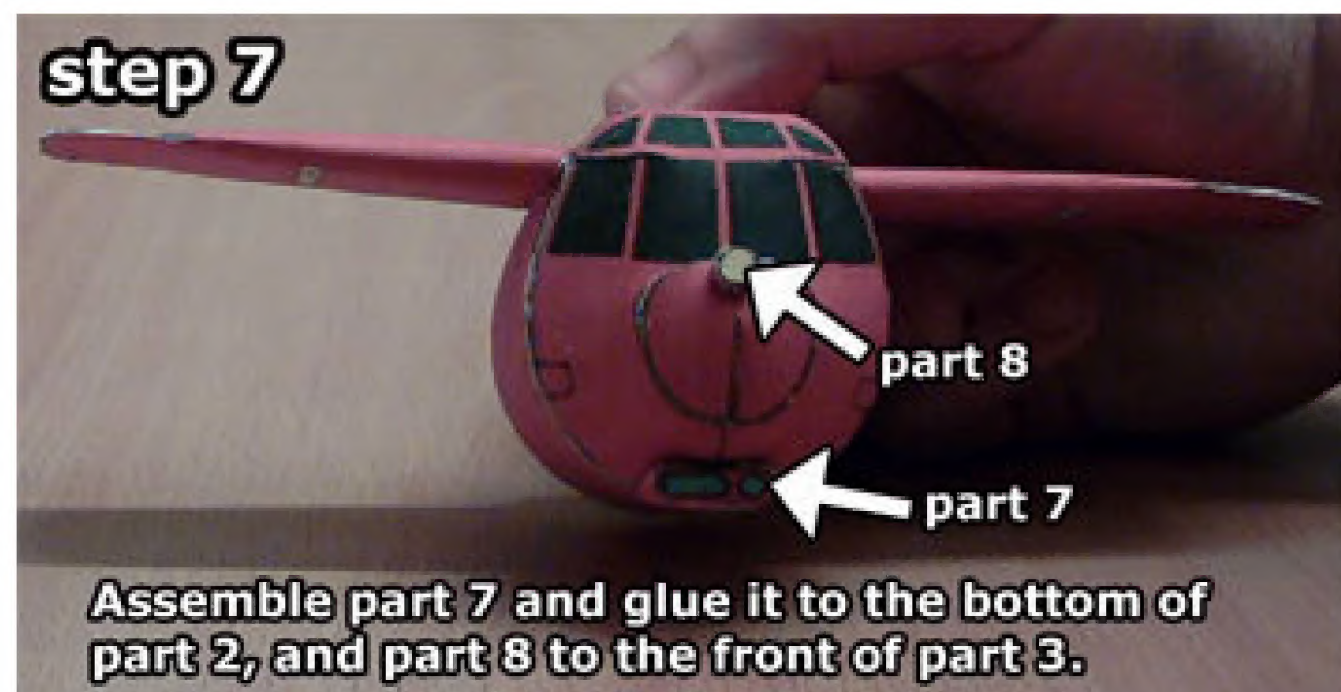

Cut out part 5. Score and fold the flaps, then place a small metal rod down the middle of the part and fold the part double. Remove the metal rod and glue the opposite side of the part together with the flaps. This way the wing will have a nice, curved front.

### step 6

Do the same for part 6, then glue both parts to part 4 by pushing the protruding flaps (which you shouldn't score!!) through the slits.

### step 7

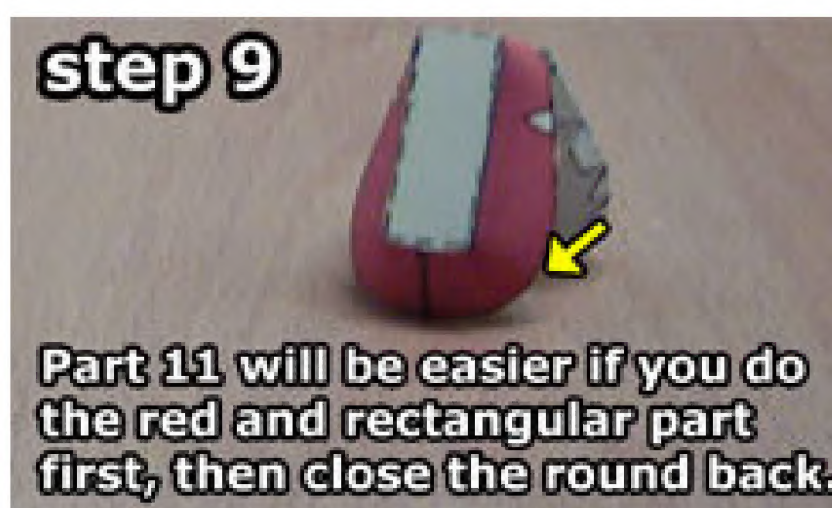

Assemble part 7 and glue it to the bottom of part 2, and part 8 to the front of part 3.

### step 8

Assemble parts 9 and 10 (don't forget to cut the six slits on part 10!!) and glue them to part 4.

### step 9

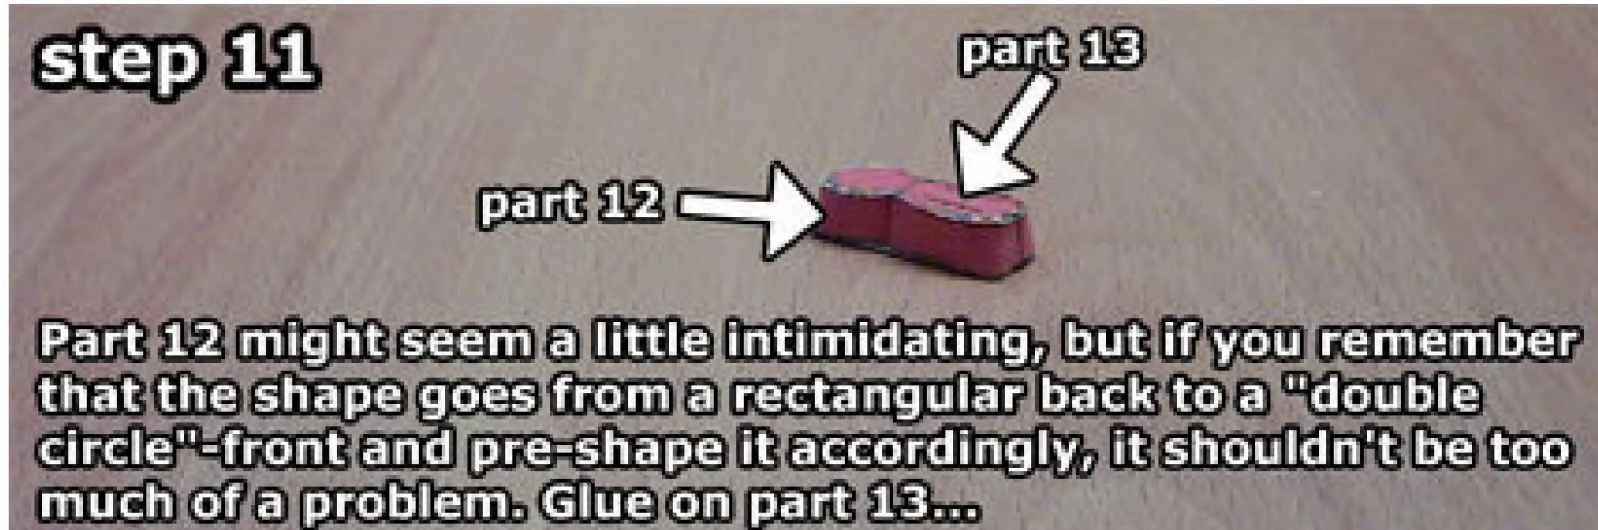

Part 11 will be easier if you do the red and rectangular part first, then close the round back.

### step 10

Glue part 11 to the rest of the hull.

### step 11

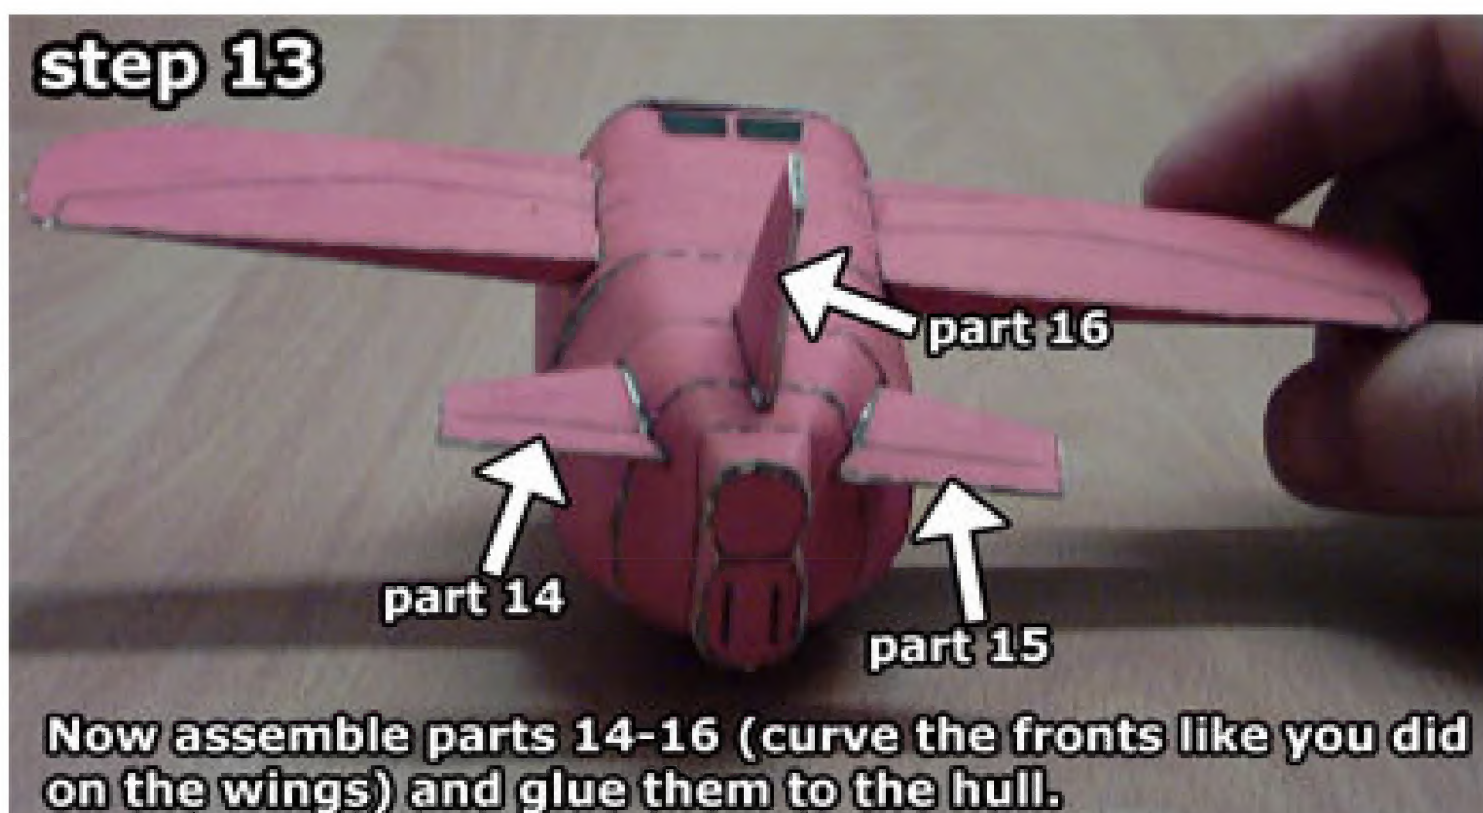

Part 12 might seem a little intimidating, but if you remember that the shape goes from a rectangular back to a "double circle"-front and pre-shape it accordingly, it shouldn't be too much of a problem. Glue on part 13...

### step 12

...before glueing it to the rest of the hull.

### step 13

Now assemble parts 14-16 (curve the fronts like you did on the wings) and glue them to the hull.

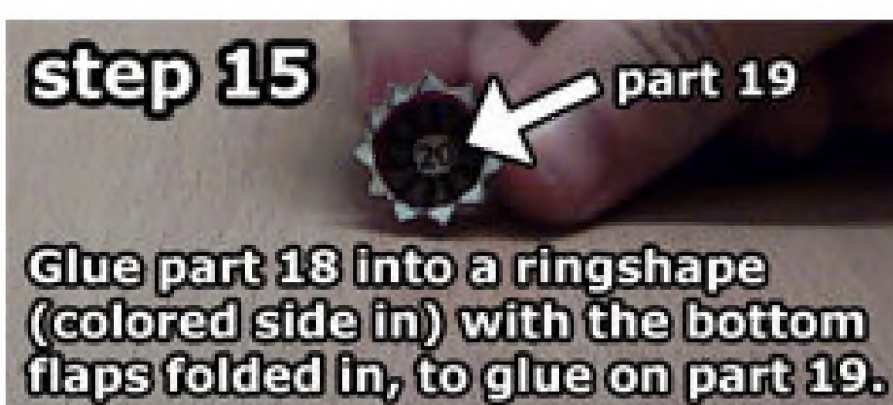

## step 14

Assemble part 17 and glue it underneath the wing.

## step 15

Glue part 18 into a ringshape (colored side in) with the bottom flaps folded in, to glue on part 19.

## step 16

Glue part 20 into a cone, then glue it to part 19.

## step 17

Cut out the hole on part 21 and assemble it, then glue part 18 to the back of the hole.

## step 18

Glue part 22 to part 23, the glue part 22 inside part 24 like parts 18 and 19.

## step 21

Glue together the front and back of the engine and glue it to the engine mount on the wing.

## step 19

Glue together parts 25 and 26...

## step 20

...then glue part 24 to the back.

## step 22

Repeat this process three more times on parts 27-54 to complete your Orange Star Bomber.

Thank you for downloading and building a Ninjatoes' paper model!!!
